INTRODUCTION

01 INTRODUCTION

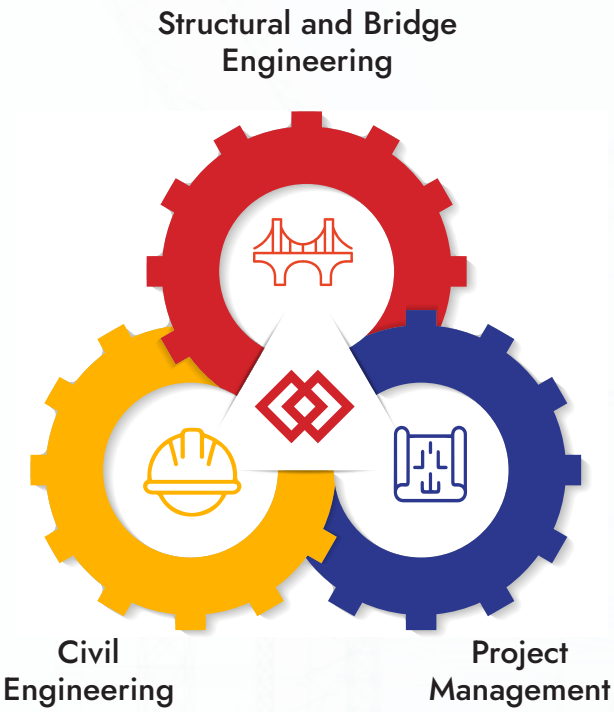
TEKNICON LTD is a multidisciplinary local consultancy firm established in June 2009 and registered in Tanzania with the Engineers Registration Board (ERB) as a Local Engineering Consulting Firm. The company provides professional technical design, consulting engineering, construction supervision and project management services to public and private sector clients.

The firm is wholly owned by Tanzanian nationals and is legally registered under the Companies Act. TEKNICON is also a member of the Association of Consulting Engineers Tanzania (ACET), confirming its standing within the professional consulting engineering sector.

From its offices in Dar es Salaam, TEKNICON delivers practical, cost-effective and quality-driven engineering solutions for buildings, infrastructures, warehouses, bridges, hospitals, terminals and industrial developments. The company combines strong technical capability with hands-on project management and construction-stage support.

Background and Organization of the Company

TEKNICON provides consulting engineering services in the principal fields of civil engineering, structural engineering, bridges and related project management services. The firm is organized around three main technical service departments:



The company's objective is to deliver clients' precise requirements with the highest level of quality, within the agreed budget and timeframe. This is achieved through constant dialogue with clients, disciplined coordination and strict adherence to internal quality control and assurance procedures.

VISION AND QUALITY ASSURANCE STATEMENT

02 VISION AND QUALITY ASSURANCE

Vision Statement

To improve the quality of life for human beings through engineering excellence

Quality Assuarance

TEKNICON applies quality assurance procedures that prescribe checks and audits required to ensure soundness, correctness and interface compatibility of engineering solutions. These procedures are implemented in accordance with applicable laws, codes of practice, technical standards and project-specific requirements.

- Technical review of design calculations and drawings before issue.
- Coordination between structural, civil, architectural, mechanical, electrical and quantity surveying inputs.
- Regular site inspections, reporting and review of contractor submissions during construction.
- Monitoring of quality, schedule, budget and compliance with contract documents.
- Final inspections and support during the Defects Liability Period where applicable.

Professional Positioning

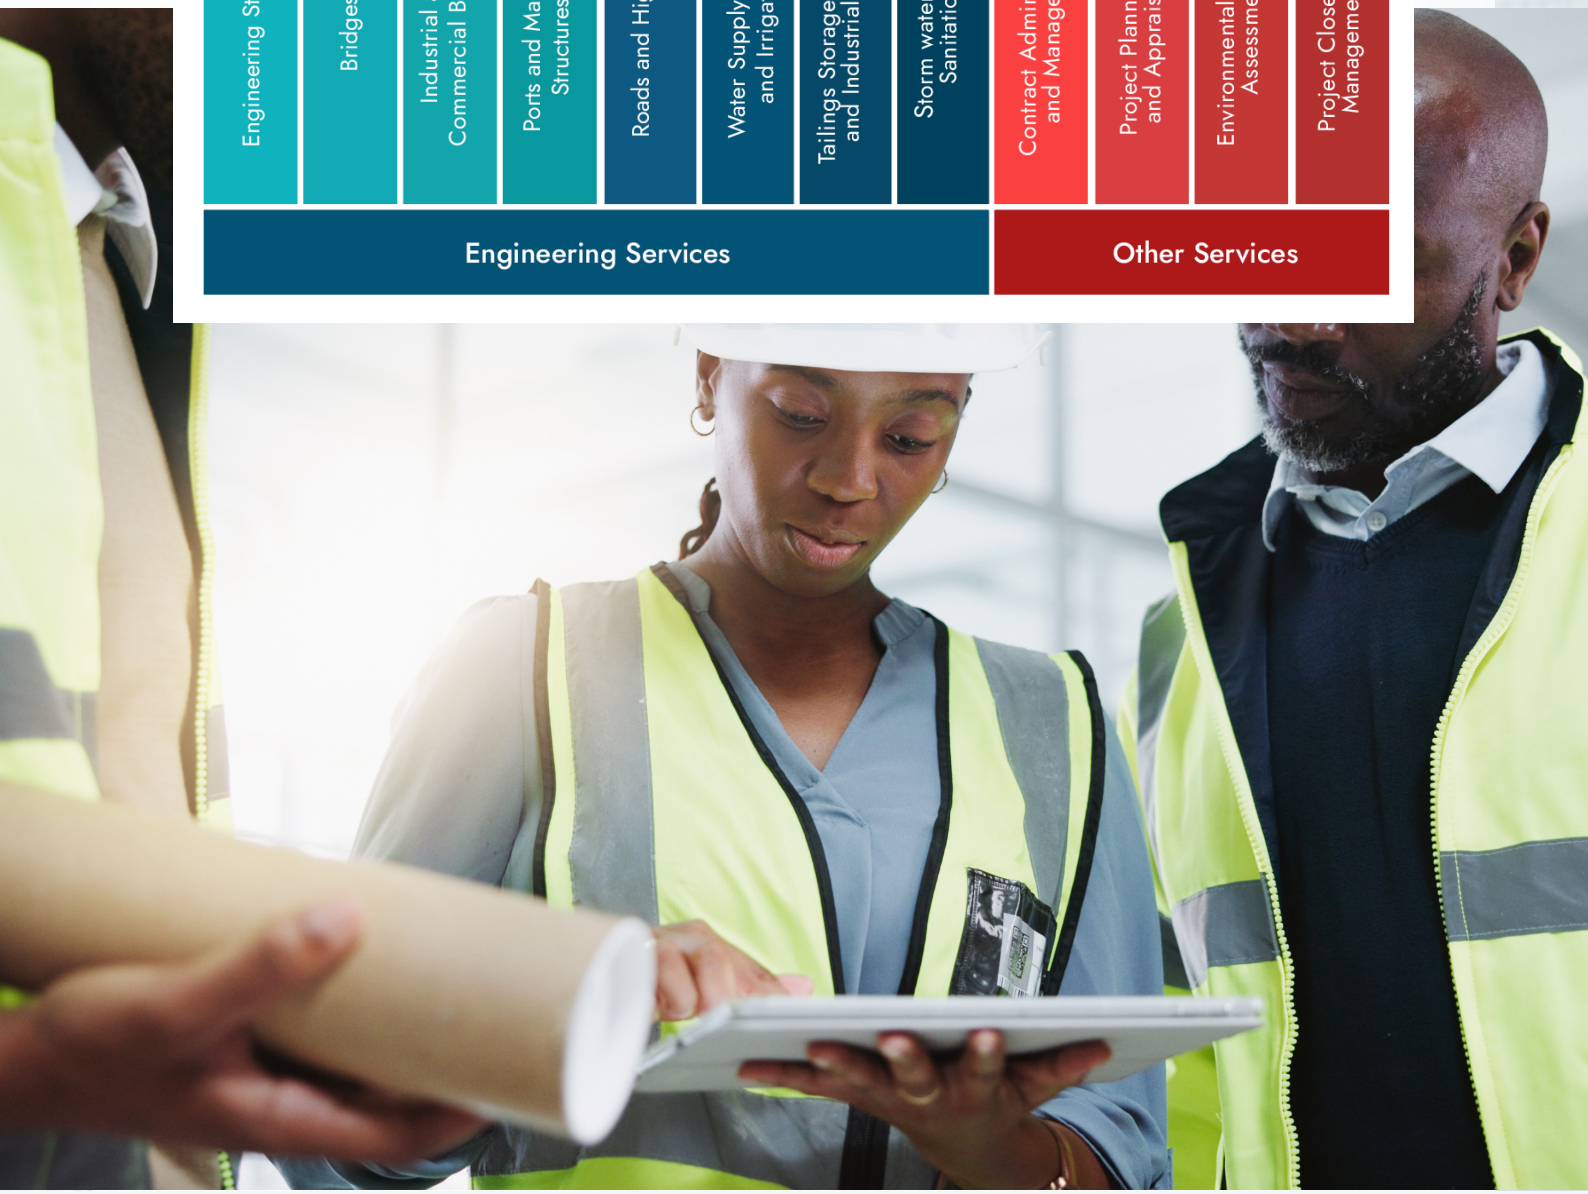
The company maintains an independent consulting position and focuses on professional judgement, responsive client service and practical engineering solutions suited to Local, Regional and Global project conditions.

SERVICES

03 SERVICES PROVIDED BY TEKNICON

TEKNICON delivers multidisciplinary consulting engineering and project management services, spanning the entire project lifecycle, from feasibility studies and concept development through detailed design, tender documentation, construction supervision, contract administration, and project close-out, as outlined below.

Structural Engineering				Civil Engineering				Project Management			
Engineering Structures	Bridges	Industrial and Commercial Buildings	Ports and Marine Structures	Roads and Highways	Water Supply, Dams and Irrigation	Tailings Storage Facilities and Industrial wastes	Storm water and Sanitation	Contract Administration and Management	Project Planning and Appraisal	Environmental Impact Assessment	Project Closeout Management
Engineering Services								Other Services			



3.1. Structural and Bridges Services

TEKNICON's structural engineering capability covers the design and supervision of buildings and special structures under varied site conditions. The firm has experience with raft foundations, reinforced concrete frames, structural steelwork, prefabricated warehouse systems and bridge structures. To mention a few:

- Feasibility Study, Concept, preliminary and detailed structural design.
- Structural calculations, general arrangement drawings and reinforcement detailing.
- Foundation design, including raft foundations and pile/foundation options where required.
- Reinforced concrete, steel, masonry and timber structures.
- Industrial, commercial, institutional and residential buildings.
- Warehouses, administration blocks, terminals, hospitals and specialized facilities.
- Bridge feasibility studies, alignment options, detailed design and construction supervision.
- Structural assessments, rehabilitation advice and remedial works proposals.
- Communication masts and special structures.
- Construction-stage inspections, RFIs, review of shop drawings and technical support.
- Structural integrity assessment and rehabilitation advice for existing buildings.

3.2. Civil Engineering and Infrastructure Services

Civil engineering services support the performance, durability and safety of developments. TEKNICON provides practical design solutions for access roads, hardstands, pavements, drainage systems, water and wastewater infrastructure.

- Site grading, earthworks and pavement design for highways/ roads, yards and parking areas (rigid pavement works).
- Storm water drainage and flood protection for developments and bridges.
- Water supply and Irrigation
- Sewer reticulation and sanitation infrastructure.
- Water Dams and Reservoirs including Weirs
- Pump stations, pipelines and reservoirs
- Tailings Storage Facilities (TSF)
- Hydrology studies, drainage designs and river protection works.
- Pump stations, pipelines and reservoirs.
- External works for buildings, warehouses, terminals and industrial plants.
- Pump stations, pipelines and reservoirs
- Topographical survey coordination and geotechnical investigation coordination.
- Civil works supervision and quality control during construction.

3.3. Project Management and Construction Supervision

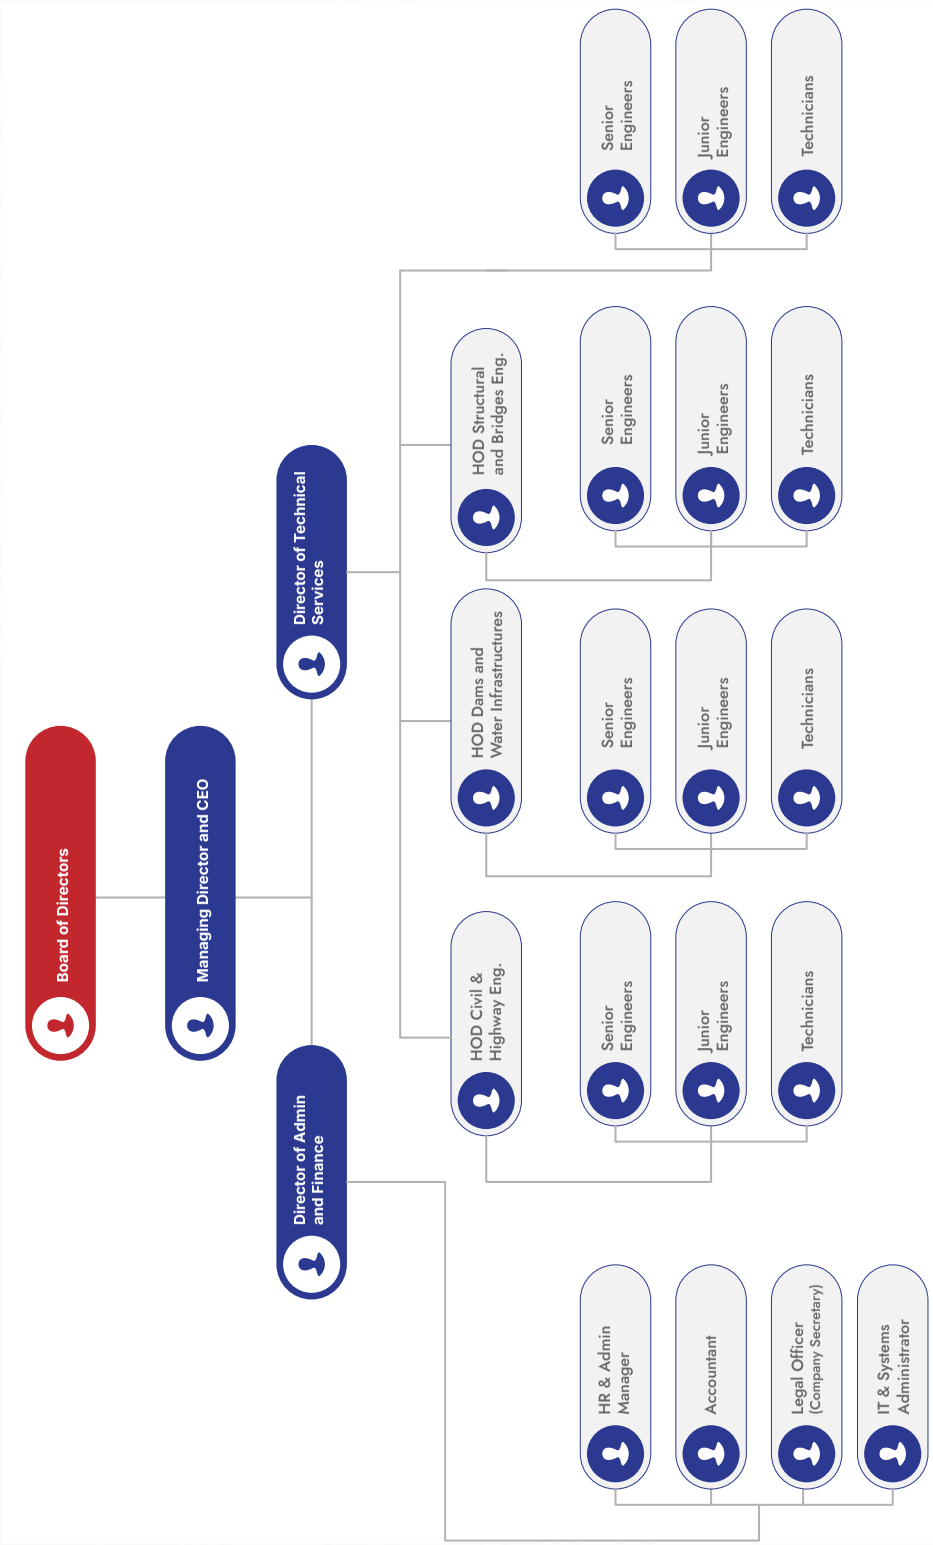
TEKNICON provides project management and construction supervision services that help clients control time, cost, quality and contract compliance. The company coordinates design teams, contractors, local authorities and client representatives.

- Contract administration and management. Project planning, monitoring and coordination.
- Coordination of multidisciplinary design teams and stakeholders.
- Tender documentation, evaluation and reporting.
- Project appraisal and implementation support.
- Construction supervision, site meetings and progress reporting.
- Progress meetings, site instructions, technical correspondence and reporting.
- Review of interim payment certificates and support for contract administration.
- Final inspections, practical completion support and defects monitoring.

ORGANIZATION STRUCTURE

04 ORGANIZATION STRUCTURE

TEKNICON's organization is currently structured in a manner as shown below:



PROJECTS

05 SELECTED MAJOR PROJECTS

5.1. Building Projects

TEKNICON has so far participated in a wide range of Building, Industrial, Health, Transport, Water Dam Engineering especially Mining Tailings Storage Facilities (TSF) and infrastructure assignments in Tanzania and the region. The following selected projects illustrate the firm's Professional experience and capacity.

Design and Construction Supervision of the 7 Storey Building - TRA ITA Hotel Accomodation at Mikocheni
Project Cost: 15.94 Billion (VAT Incl.)
Client:: Tanzania Revenue Authority (TRA)

Design and Construction supervision of the Rehabilitation of TRA Regional office in Tanga
Client: Tanzania Revenue Authority (TRA)

Design of the Uganga High Commission In Dodoma Tanzania
Client: Government of Uganda

Design of the Referral and Teaching College Hospital at Biguni in Zanzibar
Client: Government of Zanzibar, Ministry of Health

Design and Construction Supervision of the Expansion of Tobacco Processing Plant in Morogoro
Client:: Tanzania Tobacco Processors Ltd

Design and Construction Supervision of New Laboratory for Kibong'oto Hospital in Kilimanjaro Region
Client: Government of Tanzania, Ministry of Health, Ministry of Health Tanzania

Design and Construction Supervision of Workshop, Service Building and hardstand for the Container Storage in Zanzibar
Client: Zanzibar Multipurpose Terminal (ZMT)

Design and Construction Supervision of the bulk cement loading System at Lafarge Cement Factory in Mbeya

Design and Construction Supervision of Royal Soap Industrial Building for METL at Ubungo, Dar es Salaam

Design and Construction Supervision of Residential Apartments in Oysterbay – Dar es salaam

Design and Construction Supervision of the 55m Span Steelwork Structure along Coca-Cola Road Dar Es Salaam
Client:: GSM LTD, Dar Es Salaam, Tanzania

Design and Construction Supervision of the Medical Storage Warehouse at Keko, Dar-es-Salaam
Client: Tanzania Medical Store Department (MSD), Funded By USAID

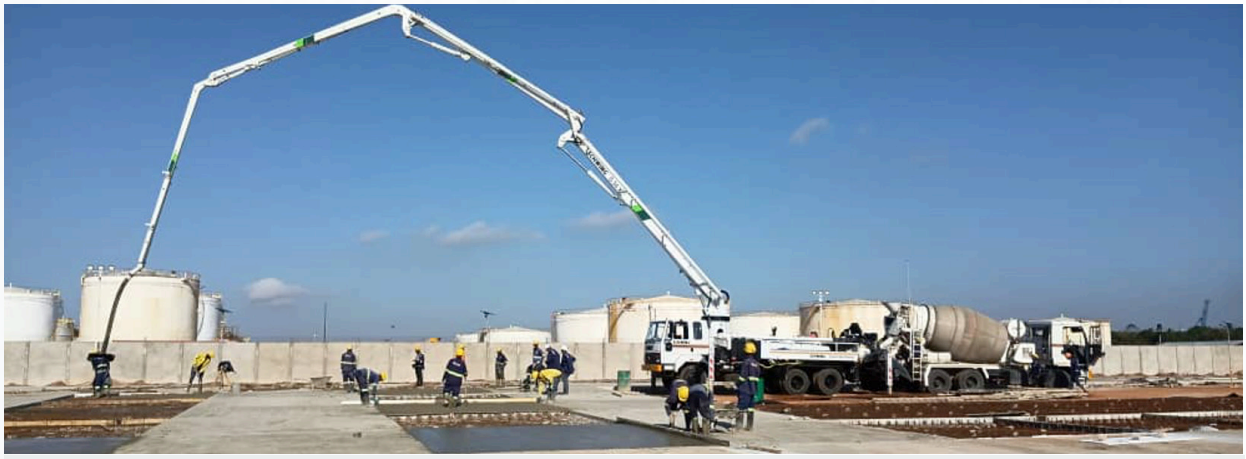
Design and Construction Supervision of the Medical Storage Warehouse in Kigali, Rwanda for the Ministry of Health Kigali Rwanda, Funded By USAID & Grobal Fund

Design and Construction Supervision of the Storage Warehouse at Mbeya
Client: Tanzania Medical Store Department (MSD), Funded by USAID & GLOBAL FUND

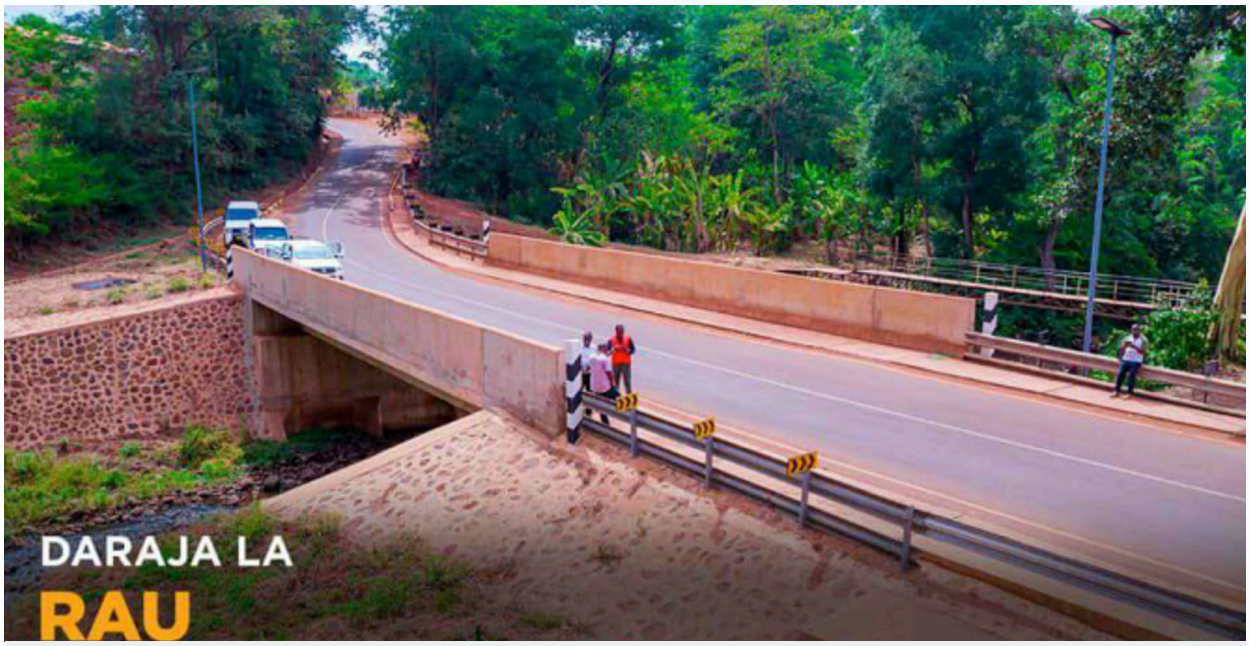
5.2. Infrastructure Projects

Feasibility Study, Design & Construction Supervision of Zimbili Bridge for Dar es Salaam Metropolitan Development Project (DMDP) **Client:** Ilala Municipal Council, Dar es salaam

Design and Construction Supervision of New Nanyumbu Bus Terminal.
Client: Nanyumbu Town Municipal Council.



Feasibility Study, Detailed Design and Construction Supervision of a Rigid Pavement Hardstand for Heavy-duty Fuel Truck Parking at TIPER yards in Dar es salaam.



Feasibility Study for Detailed Engineering Design and Preparation of Tender Documents. Rau Bridge along the Rau Madukani, Mamboleo, Materuni Road, Moshi
Client: TARURA

Feasibility Study, Design & Construction Supervision of Ulongoni Bridge for Dar es Salaam Metropolitan Development Project (DMDP)
Client: Ilala Mnucipal Council, Dar es salaam

Design and Construction Supervision of New Mpanda Bus Terminal
Client: Mpanda Municipal Council

Feasibility Study, Detailed Engineering Design and Preparation of Tender Documents for Upgrading of Wenda – Mgama Road (19km) in Iringa District – Ihemi Cluster and Mtili – Ifwagi – Mkuta Road (14km) in Mufindi District – Ihemi Cluster to Appropriate Sealing Standard **Client:** TARURA

Design and Construction Supervision of the Furahisha Pedestrian Flyover Composite Bridge and the additional lane from Furahisha to Ghana in Mwanza Region, covering 0.723 km, in association with Advanced Engineering Solutions Ltd.

Feasibility Study, Environmental & Social Impact Assessment [ESIA], Detailed Engineering Design and Preparation of Tender Documents for Upgrading of Matomondo - Mlale Road (23km) in Songea District to Bitumen Standard in association with Advanced Engineering Solutions Ltd.

Design and construction supervision for diversion of 8.6km gravel road from Mnekezi to Lwamgasa along Katoro-Lwamgasa road including Box Culvert and several pipe Culverts for TARURA/Buckreef Gold Company in Geita Region

Design and Construction Supervision of the Helicopter Pad (HELIPAD) for Buckreef Gold Company at Mnekezi Village in Geita Region

5.3. Mining Tailings Storage Facilities (TSF), Clear Water Dams Projects and the Associated Infrastructures

Teknicon ltd has also been involved in multitudes of projects related to Mining and Water sector specifically in the areas of Tailings Storage Facilities (TSF) and the auxiliary infrastructures, Water Dams, Irrigation and training of water courses in terms of Designs, Design Reviews, Construction Supervision and Structural Audits.
Below are some photos typifying some of the projects undertaken in this Portfolio.

Design and Construction Supervision of 150Million Lts Water Reservoir for Shanta Mining Company Ltd at New Luika Gold Mine in Songwe Region.

Design and Construction Supervision of 350Million lts Masonry Water Dam for Shanta Mining Company Ltd at New Luika Gold Mine Accross Luika River in Songwe Region.

Design Review and Construction Supervision of TSF2 Phase 1 for Shanta Mining Company Ltd at New Luika Gold Mine in Songwe Region.

Design Review and Construction Supervision of TSF2 Phase 2A for Shanta Mining Company Ltd at New Luika Gold Mine in Songwe Region.

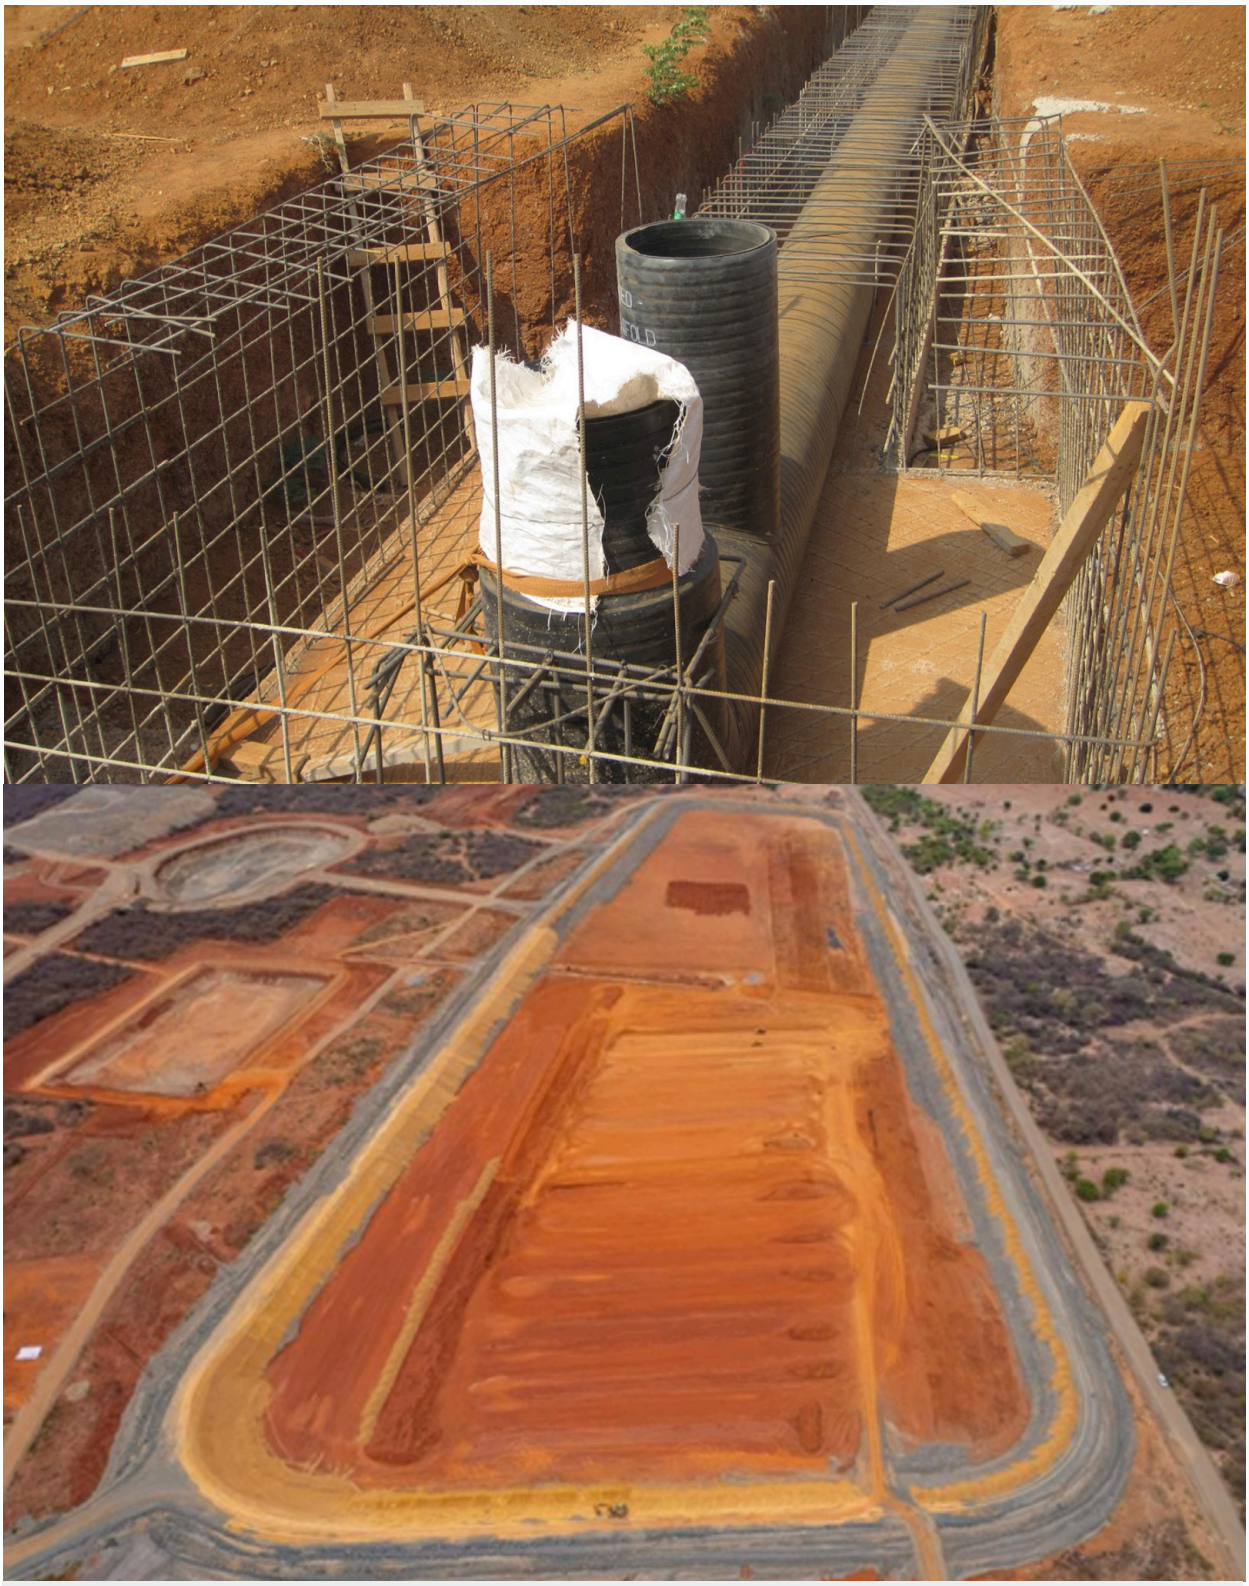
Design Review and Construction Supervision of TSF2 Phase 2B for Shanta Mining Company Ltd at New Luika Gold Mine in Songwe Region.

Design and Construction Supervision of TSF2 Phase 3 for Shanta Mining Company Ltd at New Luika Gold Mine in Songwe Region

Design and Construction Supervision for Energy dissipater for TSF2 supernatant water for Shanta Mining Company Ltd at New Luika Gold Mine in Songwe Region.

Construction Supervision of TSF2 Phase 3B for Shanta Mining Company Ltd at New Luika Gold Mine in Songwe Region

Design and Construction Supervision of TSF2 Cell 1 for Buckreef Gold Company Ltd at Mnekezi in Geita Region



Design and Construction Supervision of TSF1 for Shanta Mining Company Ltd at Ikungi in Singida Region

Design and Construction Supervision of TSF2 Cell 2 for Buckreef Gold Company Ltd at Mnekezi in Geita Region

Design and Construction Supervision of TSF1 Phase 1 for Matongo Gold Mine Ltd at Matongo in Tarime District

Construction Supervision of TSF1 Phase 2 for Shanta Mining Company Ltd at Ikungi in Singida Region

Design and Construction Supervision of TSF2 Cell 2 Phase 2 for Buckreef Gold Company Ltd at Mnekezi in Geita Region

Design Review and Construction Supervision of TSF1 for Anglo de Beers Tanzania Ltd at Mwaoga Village in Chunya District, Mbeya Region

Design and Construction Supervision for the relocation and training of River Nyamazovu for Buckreef Gold Company ltd at Mnekezi area in Geita Region

Design and Construction of Water Supply & Irrigation Phase Scheme and Auxiliary Structures For Kilombero Plantation Ltd, Ifakara Kilombero District in Morogoro Region

PERSONNEL

06 KEY PERSONNEL

This section presents TEKNICON LTD key professional and technical staff, including civil/ structural engineers, a quantity surveyor, and senior civil technicians. The team has strong experience in engineering design, construction supervision, project management, quantity surveying, and site establishment across Tanzania and selected regional markets.

Eng. Florence Msambila

Civil/Structural Engineer

Country
- Tanzania, Botswana, South Africa

Experience
- 31 years

Eng. Robert D. Lubuva

Civil/Structural Engineer

Country
- Tanzania

Experience
- 24 years

Eng. Mbaraka M. Shaffi

Civil/Structural Engineer

Country
- Tanzania, Botswana, South Africa

Experience
- 34 years

Eng. Arnold G. Rutaindurwa

Structural Engineer

Country
- Tanzania

Experience
- 17 years

Eng. William Shigongo Sayi

Civil/Structural Engineer

Country
- Tanzania

Experience
- 10 years

Eng. Alexander Nangale Makula

Civil Engineer

Country
- Tanzania

Experience
- 12 years

Eng. Elisa Valentine

Civil/Geotechnical Engineer

Country
- Tanzania

Experience
- 10 years

Eng. Nelson Mdeka

Civil/Structural Engineer

Country
- Tanzania

Experience
- 10 Years

Eng. Suleiman Hanti

Civil/Structural Engineer

Country
- Tanzania

Experience
- 17 Years

Mary Mroso

Quantity Surveyor

Country
- Tanzania

Experience
- 7 years

Ezekiel Mulinda

Civil Engineer

Country
- Tanzania, Botswana, South Africa

Experience
- 27 years

Godfrey Gosbert Mboyelwa

Civil Engineer

Country
- Tanzania

Experience
- 12 years

Salvatory Epiphany

Senior Civil Technician

Country
- Tanzania, Botswana, South Africa

Experience
- 12 years

Athuman Dulle

Senior Civil Technician

Country
- Tanzania

Experience
- 9 years

Overall Team's Strength

- The team combines senior consulting engineers, registered professional engineers, Junior Engineers, a quantity surveyor, and senior civil technicians.
- Core strengths include civil and structural engineering design, construction supervision, project coordination, project management, quantity surveying, and site quality control.
- The listed staff have accumulated experience ranging from 7 to 34 years, with exposure mainly in Tanzania and abroad

LICENCES

07 LICENSES & CERTIFICATES OF REGISTRATION

To ensure seamless service delivery, TEKNICON LTD maintains full, up-to-date statutory and professional registrations for Consulting Engineering Business in Tanzania. We ensure all our licenses and certifications remain continuously active and compliant.

No.	Licenses / Certificates	Registration Number
1	Certificate of Incorporation (BRELA)	71672
2	VAT Registration (Tanzania Revenue Authority)	VRN 40-004932-P
3	Taxpayer Identification Number (TRA)	TIN 108-536-756
4	Business License	B.L. No: BL01396912025-2600017652 (Exp. Date: 2026-11-19)
5	Tax Clearance Certificate	131-0261-6147 (Expiry Date: 2026-12-31)
6	Engineers Registration Board (ERB)	LCF 122 / Registration No. 0122
7	ERB Annual Practicing License for the Year 2026	ERBT01341 Expiry Date: 2026-12-31
8	Association of Consulting Engineers Tanzania (ACET)	061
9	Occupational Safety and Health Authority (OSHA)	313-102-022
10	National Social Security Fund (NSSF)	1026954

CLIENTS &
PARTNERS
