

Proposed Teknicon Website Information Architecture

Recommended primary navigation

Home | About Us | Services | Projects | **Sectors | Insights** | Contact Us

1. Home

Purpose: Quickly establish credibility, expertise and a path to enquiry.

- Slideshow 1 Text: “We are Consulting Engineers and Project Managers”
 - Supporting message: We do multidisciplinary engineering, design, construction supervision and project management.
 - Calls to action (Two Buttons): *Explore Our Services* and *Request a Consultation*
- Slideshow (2 to 3/4 max) Texts/Captions and photos: “Teknicon to provide...”
- Brief introduction to Teknicon with a linked button to “About us Page” or Foreword from CEO with a linked button to “Find Out More About Teknicon”
- Service highlights
 - Structural & Bridge Engineering
 - Civil Engineering & Infrastructure
 - Water, Dams & Tailings Storage Facilities
 - Project Management & Construction Supervision
- Featured projects
- Sectors served
- Why work with Teknicon / key differentiators
 - Tanzanian-owned local consultancy
 - ERB-registered consulting firm
 - Established since 2009
 - Design-to-construction support
- Client and partner logos
- Contact / enquiry strip

2. About Us

Purpose: Build trust before a prospective client explores services or makes contact.

- **Company Overview**
 - Background, establishment, ownership, office location and professional positioning
- **Vision, Mission & Values**
 - Vision statement, quality-driven approach and core principles
- **Leadership & Our Team**
 - Board/management and key technical personnel
 - Short biographies, qualifications, disciplines and experience
- **Quality, HSE & Compliance**
 - Quality assurance approach, design reviews, site inspections, coordination and compliance procedures
- **Organisation Structure**
 - Simplified, web-friendly organisation chart
- **Licences & Professional Memberships**
 - ERB, ACET, BRELA, OSHA and other relevant registrations
- **Download Company Profile**
 - Current PDF profile and any capability statement

3. Services

Purpose: This should be the main capability menu, structured around what a client is hiring Teknicon to do.

- **Engineering Design & Consultancy**
 - Feasibility studies
 - Concept, preliminary and detailed design
 - Technical assessments and rehabilitation advice
 - Tender documentation and design coordination

- **Structural & Bridge Engineering**
 - Buildings and special structures
 - Reinforced concrete, steel, masonry and timber structures
 - Foundations and structural detailing
 - Bridge feasibility, design and supervision
 - Structural integrity assessments and remedial works
- **Civil Engineering & Infrastructure**
 - Roads, pavements, hardstands and external works
 - Drainage, flood protection and river protection
 - Water supply, sanitation and wastewater
 - Pipelines, pump stations and reservoirs
 - Survey and geotechnical investigation coordination
- **Water, Dams & Mining Infrastructure**
 - Water dams, weirs and reservoirs
 - Irrigation infrastructure
 - Tailings Storage Facilities (TSF)
 - Watercourse training and associated infrastructure
 - Design review, structural audits and construction supervision
- **Project Management & Construction Supervision**
 - Project planning, appraisal and implementation support
 - Contract administration
 - Tender evaluation and reporting
 - Site supervision, quality control and progress reporting
 - Payment certification, completion and defects-liability support

Each service page should follow one consistent format: overview, scope of work, typical deliverables, relevant sectors, selected related projects and a consultation call-to-action.

4. Projects

Purpose: Demonstrate proven experience rather than simply listing past work.

- **All Projects**
 - Filter by sector, service, location and project status where possible
- **Buildings & Facilities**
 - Commercial, industrial, residential, health, warehouse and institutional developments
- **Transport & Urban Infrastructure**
 - Bridges, roads, terminals, hardstands, pedestrian infrastructure and related works
- **Water, Dams & Tailings Storage Facilities**
 - Reservoirs, dams, irrigation, TSFs, river works and mining infrastructure
- **Featured Project Case Studies**
 - A fuller page for priority projects, with challenge, scope, solution, project facts, images and outcome

Each project page should include: client (where permission allows), location, year, services delivered, project value if publishable, gallery and related services.

5. Sectors

Purpose: Helps clients immediately recognise Teknicon's relevance to their industry. This is different from *Services*: a service is what Teknicon does; a sector is who or what it serves.

- Buildings, Commercial & Residential
- Government & Public Infrastructure
- Health & Education Facilities
- Industrial, Manufacturing & Logistics
- Transport & Urban Development
- Water, Agriculture & Irrigation
- Mining & Extractives

6. Insights

Purpose: Positions Teknicon as a credible technical authority and gives the site fresh content for search visibility.

- News & Updates
- Publications / Downloads
- Career

This section can be launched later if ongoing content publishing is not yet planned. It should not be added as an empty menu item.

7. Contact Us

- Office address, telephone/mobile, email and social media links
- Google map – office location
- Enquiry form
 - Name, organisation, email, phone, enquiry or comment and e.t.c
- Working hours and social links

Footer structure

- **About Teknicon:** short profile and company profile download
- **Services:** Main Teknicon capability areas
- **Quick Links:** About Us, Projects, Sectors, Contact
- **Professional Credentials:** selected registration and membership logos or accreditations and so forth
- **Contact Details:** address, phone, email and social media links
- **Legal:** Privacy Policy, Terms of Use, Copyright
